DEPARTMENT OF MECHANICAL ENGINEERING

LETTER OF RECOMMENDATION

To whom it may concern

As the Assistant Professor of Mechanical Engineering at National Institute of Technology, Hamirpur, I am grateful to write this letter of recommendation for Ronak Lamba, an undergraduate student of the Mechanical department.

I have known him over the last 2 years, teaching him the following subjects: Mechanics of solids for 4th Semester, Machine Design for 5th Semester.

I am extremely pleased with the fact that the candidate I am recommending is truly deserving of being a student at IIT Kanpur Surge Program. He has regularly been among the top performers in her class throughout her semester, making her one of the few individuals to be given the opportunity to pursue a Research Internship at IIT Kanpur.

He never misses an opportunity to try out new ideas and put what he's learned into practice. He has a thorough understanding of the ideas of machinery design, production, operations and Automobile, as well as the scientific underpinning for each.

He has always been an active student in all of my classes and discussions, consistently scoring more percentage in the courses. He has been consistent in his contributions and has always met deadlines while remaining engaged and interested in the field's practical applications. His efforts to link classroom lectures to real-world applications have substantially bolstered his foundation. As a result, he has a broad and deep understanding of disciplines such as Machine Design. Aside from classwork, he has participated in and excelled in a variety of other endeavors.

I am absolutely confident that Ronak Lamba would be fit for this research internship program. Not only will he bring the kind of skills and experience you are looking for in an intern, but he will also quickly become an asset and help you in any way he can.
